GDP per capita: **44,886** EUR – same size as Switzerland

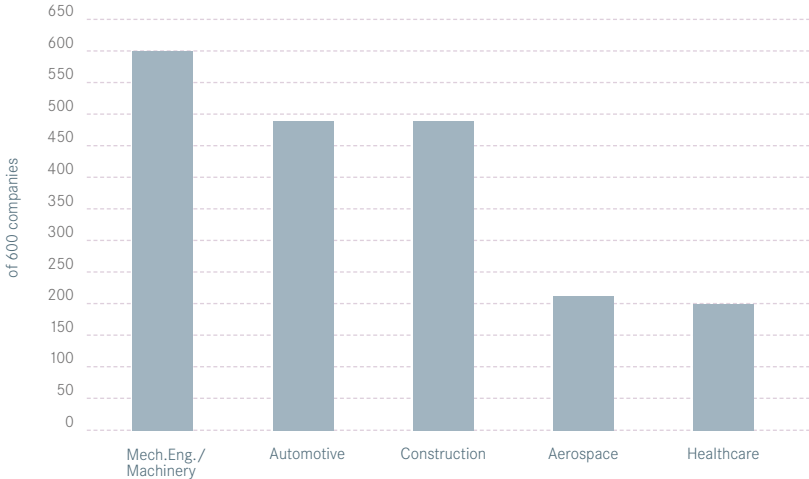

R&D intensity: **4.9 %** of the GDP are R&D expenditures – leader in the EU

Less is more. Profit

Lightweight technology is a key factor for the society and industry of tomorrow. The saving of weight, material and energy is a prerequisite for a sustainable, intact world in view of a steadily growing world population and dwindling resources. From product concept to design methods to new materials, lightweight technology enhances all stages of the value creation process: **concept – engineering – simulation – manufacturing.**

The most important industries for lightweight technology in Baden-Württemberg

Leichtbau BW – What we can do for you!

Leichtbau BW is a collaborative network of more than 2.400 companies and more than 360 research facilities – this is probably the largest lightweight network in the world.
